

# Polyester Fibers Worldwide

AN EMPIRE INVESTMENT HOLDINGS COMPANY  
[www.poly-fibers.com](http://www.poly-fibers.com)

Polyester Fibers is the largest and most flexible manufacturer and distributor of value-added, high-loft nonwoven materials for the bedding, filtration, craft, furniture, industrial and seasonal markets in the United States.

POLYESTER FIBERS

Comprised of 5 operating units: Tupelo Fibers, Cameo Fibers, Cumulus Fibres, Mountain Mist and Buffalo Batt; the company has more than 450 employees serving thousands of customers in the United States, Canada, and Europe. Polyester Fibers develops and manufactures a wide variety of fiber products that help our customers deliver quality and comfort to people around the world.

Our customers rely on our research and development capabilities, which have provided decades' worth of innovative products and close to one hundred patents for the markets we serve. We understand that this is an essential part of our commitment to maintain the reputation of a leader in the fiber industry.

Polyester Fibers utilizes various technologies such as thermal bonded, spray bonded, saturated bonded, needle punch, and air lay throughout our strategically located and flexible production facilities. Our products meet stringent performance criteria required by our customers. One of the company's greatest assets is the diversity of the end markets we serve. This reduces our reliance upon any particular sector and insulates our financial performance from changing conditions in any particular market.

BUFFALO BATT

For over 100 years, Buffalo Batt has been a leading manufacturer and distributor of innovative polyester fiber products, primarily sold through retail channels including mass merchants, chain craft stores and independents. The company maintains a number of highly recognized trademarks, including BBSatin Star and Buffalo Snow. Due to our concern and awareness regarding environmentally safe products, Buffalo Batt introduced the world's first man-made environmentally friendly, naturally based craft fibers, Eco-Snow™; which was first introduced to the market in 2006.

CAMEO FIBERS

Since 1982, Cameo Fibers has been a leading manufacturer of value-added, high-loft nonwoven materials for various applications in the bedding, furniture, automotive, industrial and aviation markets. At each of its strategically located plants, the company utilizes multiple technologies and processes, which provides its customers with a wide range of density, tensile strength and resilience. Cameo Fibers' customers are some of the largest and most recognized names in the industry.

CUMULUS FIBRES

For more than 35 years, Cumulus Fibres has manufactured a wide selection of unique polyester media for the air filtration industry; serving the industrial, commercial and residential markets. Through its proprietary and patented CumuFlex manufacturing process, Cumulus Fibres provides high quality and value-added products that are highly responsive to its customers' needs. Its filtration products are sold to air filter manufacturers and distributors, and in certain cases are ultimately sold through retailers throughout the world. Cumulus Fibres' customers are some of the largest and most recognized names in the industry.

MOUNTAIN MIST

Mountain Mist is the original inventor of commercial filler products and has been producing and marketing its products since 1846 while continuing to offer new, innovative products. We provide the level of quality that quilters have learned to expect. Our customers have access to a full line of products, patterns and an extensive knowledge of the industry. In 2006, Mountain Mist became the first to offer a complete line of eco friendly craft products, Eco-Craft™. For more information, please visit [www.mountainmistcrafts.com](http://www.mountainmistcrafts.com).

TUPELO FIBERS

Since 1985, Tupelo Fibers has been a leading manufacturer of value-added, high-loft nonwoven materials for applications specifically focused on the furniture and bedding markets. Tupelo Fibers' manufacturing processes have been arranged with flexibility in mind to accommodate value-added products for the world's largest furniture and bedding manufacturers.

**BEDDING**

Polyester Fibers serves the bedding market with a broad array of products for different applications including quilt fiber, densified batting, fire retardant (FR) border fiber and insulator pads. These products are used in mattresses and box-springs.

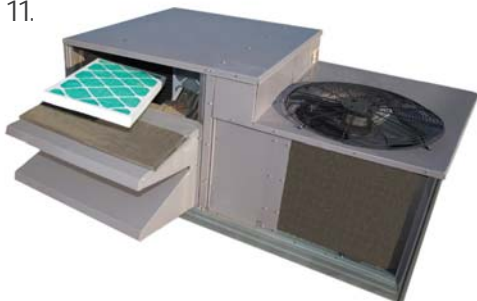

**CRAFT**

Craft products include a number of cotton, bamboo, Ingeo or polyester fiber variations that are used as batting or stuffing for quilts, comforters, pillows, decorations, toys and other soft crafts created by home crafters.

**FILTRATION**

Filtration products are used in a wide range of applications such as HVAC, paint booth, textile and residential air purification. Polyester Fibers manufactures products ranging up to MERV 11.

**FURNITURE**

Polyester Fibers provides products used in various furniture applications such as cushion wraps, fiber cushions, deck pads, trim pads and arm & back applications, among others.

**INDUSTRIAL**

Polyester Fibers produces industrial products that cover a wide variety of applications, each with unique specifications for a diverse market, such as automotive, appliance, industrial and packaging materials. Applications include acoustical absorbers, insulators, trim components, absorbents, dampeners and decouplers.

**SEASONAL**

Polyester Fibers offers a variety of seasonal products that help accentuate your holiday decorations for Christmas, Halloween, Easter and more.
