

# Fiber *passes all the tests...*

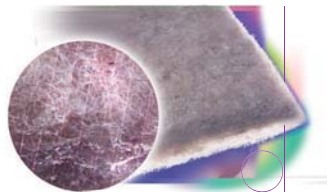

## *Comfort...FR...Availability.*

For price and performance, fiber is the natural alternative to foam, especially Polyester Fibers' patented, densified fiber components. Our fiber is odorless, hypoallergenic, inherently fire retardant and can be made anti-microbial. The ideal component solution!

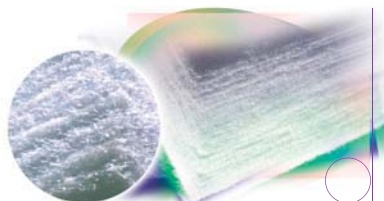

### **Polyboard®**

Ideally used as a booster for a single sided mattress, a topper lid for a foam-encased mattress and as a primary filling component just above the spring insulator.

### **Insulmax™**

Multi-colored poly pad with diagonal vs horizontal fibers for a cushioning, foam-like feel.

### **Cumuflex®**

Up to 6" mattress cores made with our patented vacuum bond system for greater consistency and resiliency.
